

Toilet Table
id: Number
Location: Number
Name: String
Rating: average

Instead of number rating
do poopys -> x-axis
scale

Entries Table
id: number
Toilet_id: number
rating: number

Toilet JSON

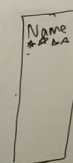

```
[ { id: 1,  
  toilet_lat: 33.44,  
  toilet_lon: -113.4,  
  name: 'Uluru'  
},  
  ...  
]
```

entry JSON

```
[ { id: 1,  
  toilet_id: 1,  
  rating: 5  
},  
  ...  
]
```

GOAL: Public bathroom Review

Go to the bathroom without having to say a lot of words
Rate the cleanliness of bathroom
